

**The results are:**

- Faster delivery time
- American quality and know-how
- More factory-installed options
- Made-to-order specifications
- Building for a better, brighter future

Venture Lighting is a worldwide innovator, manufacturer and supplier of energy efficient lighting materials, components, systems, fixtures and controls. Since being founded in 1983 and becoming part of Advanced Lighting Technologies in 1995, Venture Lighting has always been a pioneer in light source technologies. An advocate for industry terms like "LPW" and "Lumen Maintenance", Venture has always been a leader in the lighting industry.

*Customers are assured:*

- Quality
- The very best technology
- The highest level of service
- Ease of working with, speed and flexibility
- Dedicated technical and customer support

*"Over three decades of delivering Industry leading, innovative products to support the daily needs of Distributors. Every day, Venture continues to impress us with prompt shipping, from deep inventories of quality driven, ever evolving, lighting options. The proof is in the product!"*

**A DIFFERENT WAY OF LIGHT**

# Assembled in the U.S.A. from Venture Lighting

Currently, Venture Lighting is assembling six different LED product families: Modern highbays, Defender wallpacks, Low watt Environ area lighting, VFlood area lighting, SafeLit parking garage lighting and Bollards. Average orders can be assembled and shipped within 10 days or less, depending on quantities ordered and inventory. Venture Lighting has always strived to exceed customer expectations, Venture believes that assembling luminaries in the USA will allow Venture to provide customers with more options and faster delivery times.

The Venture Regional Manufacturing Center located in Glenwillow, Ohio.
